

IEEE EUROCON 2015: *Workshop on Micro/Nanoelectronic Circuits and Systems*  
Spain Chapter of the IEEE Circuits and Systems Society

**IEEE EUROCON 2015, Salamanca, Spain, September 8-11, 2015**

***Workshop on Micro/Nanoelectronic Circuits and Systems***

Organized by the Spain Chapter of the IEEE Circuits and Systems Society

The Spain Chapter of the IEEE Circuits and Systems Society, organized a workshop on September 8, 2015, during the celebration of the 16<sup>th</sup> edition of the IEEE EUROCON, held in Salamanca, Spain. The workshop, co-funded by 2015 IEEE CASS outreach initiatives, presented an overview of some recent advances in the design of micro/nanoelectronic circuits and systems in diverse application scenarios and case studies including automotive applications, smart sensing, interfacing brain and machines and flexible organic/printed electronics, which were presented by worldwide recognized experts in these fields.

The picture shows the invited speakers and the organizers participating in this workshop (from left to right: Prof. Eloi Ramon, Prof. Francisco Serra, Prof. José M. de la Rosa (Chapter Secretary), Prof. Teresa Serrano-Gotarredona (Chapter Chair), Prof. Ángel Rodríguez-Vázquez and Prof. Antonio J. López-Martín).
